HTML Form

Add an online order form to your "La Pizzeria" web site.

On the page **home.html** add the line:

<u>Order</u> your pizza online.

Order should be a hyperlink to a new page **order.html**.

Order.html

Add a heading 2:   **Place an Order**

Underneath, add the following paragraph:

You can ring us on 9899 9999 or pick up at 2121 Toorak Road, South Yarra or simply place an order via our online booking form. What could be easier?

Now, add the form. The form is to be named **order**. The `action` should submit the form to your email address so that you can check the output. The method is `post`.

The form should look similar to the following page.

How can you help to control the appearance of your form? _____

Your Name: _____

Phone: | A number we can ring |

Set a maxlength of 10
